Nature of Complaint:

"I work at the bus company in Johnston, located on Green Earth Lane in between Sym's Auto Recycle and where Pick and Pull will be located. Today was a bad day. There was rust dust flying around and leaving a film on my car. There are buses park there, and children have to ride on those buses. I know the dust is getting into the buses because I ride on them every day. You know how children touch everything and then put there fingers in their mouths. I'm afraid of them getting sick. I'm afraid of myself and my co-workers getting sick. ... I don't know how many times I have complained to town officials, senators and representatives. I am sure the air quality in very bad in the area and no one seems to care. I am hoping you can do something about this, at least investigate the fumes and dust. I can't say enough how bad the air quality is in the area. Everyone I work with complains, but I know of no one who has actually written or said anything to anyone that matters."

Please help.
